

FAST are pleased to announce that we are now able to supply an exciting new product for the treatment of pear psylla, aphids, spider and rust mite

100% green, ProTAC sf has zero residue, zero active chemical ingredients and no chance of resistance developing in target pests.

Independent trials have concluded that ProTAC sf has a 96% mortality rate on red spider mite and 82% efficacy on rust mites.

As ProTAC sf needs to dry quickly for optimal effect, best applied on a dry crop with no rain forecast with 6 hours.

We anticipate that demand for this product will be high and highly recommend early orders.

For more information, rates and orders, please contact Razvan Iorga on 07803 520340 or email: razvan.iorga@fastllp.com
