

SWD affects soft skinned fruit crops – primarily cherries, plums, strawberries, raspberries, blueberries, blackberries and grapes

- ✓ Suzukii Trap® is a specific lure with high capacity for capturing *Drosophila suzukii*
- ✓ Ready to use, with sufficient duration to last for an entire campaign (60 - 90 days)
- ✓ Certified in Organic Agriculture

FAST independently tested the leading available baits and found that Suzukii Trap® caught the most SWD and lasted longer
